ПЕРЕДМОВА

Запропонований вашій увазі збірник граматичних вправ призначений для учнів 3—6 класів загальноосвітніх шкіл, незалежно від їхнього профілю. Граматичний і лексичний матеріал відповідає шкільній програмі, при підборі лексичних одиниць також ураховувалися інтереси учнів даної вікової групи.

Граматичні таблиці збірника допоможуть учням не тільки зрозуміти, але й самостійно сформулювати ряд правил англійської граматики. У межах кожного розділу вправи розташовані за рівнем складності, що дасть учителеві можливість підбирати вправи, орієнтуючись на мовну підготовку учнів. Наприкінці кожного розділу подано тести для самоперевірки, які не тільки допоможуть учням об'єктивно оцінити свої успіхи і виявити свої слабкі місця, але і визначити, до повторення яких матеріалів варто повернутися. «Ключі» наприкінці збірника допоможуть учням скоригувати допущені помилки.

Поданий у посібнику матеріал супроводжується кумедними ілюстраціями, які сприяють більш жвавому сприйняттю граматики і роблять процес її засвоєння простішим і цікавішим.

Посібник може використовуватися як додатковий матеріал для засвоєння граматичних явищ на уроках, так і для самостійної роботи учнів удома.

АРТИКЛЬ (THE ARTICLE)

Артиклі (*a/an, the*) є основними визначниками іменників. Вони не мають самостійного значення, а тільки підкреслюють, про який предмет, особу або явище йдеться. Тому перед іменником майже завжди вживається артикль.

Неозначений артикль A (an)	Означений артикль The
показує, що перед нами знаходяться такі предмети: Неозначений, якийсь один, деякий, будь-який, що згадується вперше, один з ряду подібних. He has a dog. (У нього є собака.) Kyiv is a city. (Київ — це місто.)	Означений, конкретний, відомий, от цей, уже згадуваний раніше, єдиний у своєму роді. The dog is big and clever. (Цей) Собака великий і розумний.) Kyiv is the capital of Ukraine. (Київ — столиця України.)

Is the Moon More Important than the Sun?

I am Mike. I have two brothers: Max and Dan. Max is two years younger than me. Dan is four years older than Max. He is eight. So, Max is four and I am six. Max is more friendly than Dan. Dan is more serious than me. Max isn't serious. He is very curious. I think he is the funniest little boy in the world. He asks hundreds of unusual questions about usual things. He can

ask, “Is the moon more important than the sun?” Dan and I laugh. But Max has his own answer to his question. He says, “Yes, the moon is more important than the sun, because without the moon it is absolutely dark at night. So, the moon is the most important planet in the sky”. I think Max is the most curious little brother of all little brothers.

American Pets

Americans have got a lot of pets. Their pets are the members of their families. Many people have got dogs, cats, birds, fish, rabbits and even snakes as their pets. And many classrooms have got special places for small pets. Schoolchildren learn to take care of their pets at school, as they have small pets, such as frogs, hamsters or fish, in their classroom.

Discovery Channel often shows documentaries about rescue of domestic animals. Some masters forget to feed their pets or

A Wild Pet of a Monastery

It happened in Thailand. One day a young monk went to his native village. He wanted to see his relatives and friends. They talked a lot. So, he returned to his monastery in the evening.

It was dark in the jungle, but the young monk wasn't afraid of that.

Suddenly he heard a very strange cry. He thought it was a baby's cry. The monk was very kind and warm-hearted. He stopped, listened to the cry, and came nearer. He was right. There was a baby in the jungle. The monk saw an absolutely helpless, defenceless little tiger cub. Hunters killed its mother and the baby was alone and frightened. The monk took that poor weak baby in his hands and brought it into the monastery.

All the monks liked the tiger cub very much. They called it Iko. The monks took care of him, fed him. They walked and played with Iko. He became a real pet of the monastery. The monks also taught him to be kind, polite and obedient. Iko loved them as his own family. He was a good pupil. Step by step, the tiger pet became absolutely tame and friendly.

Now, Iko is about five years old. He is a beautiful, strong, big tiger. But he lives in a monastery and doesn't want to leave for the jungle.

The Fox and the Crow

One day a big old crow sat on the tree. She kept a bit of cheese in her mouth. "I ... (*to have*) dinner soon", she thought.

A hungry wart-hog went along the path. He saw the crow. He wanted to get the cheese. "I ... (*to show*) her my funny face, she ... (*to laugh*). She ... (*to drop*) the cheese and I ... (*to get*) it", he planned. So, the wart-hog showed the crow his funny face. But she didn't even smile.

"Drop the cheese to me", called a big brown bear. "I ... (*to give*) you this pot of honey", he asked. But the crow didn't like honey.

The crow was about to eat the cheese, when a sly little fox went along the path. He had no plans. He just said, "Oh, beautiful crow! Nice to meet you. My lady, sing me your sweet tune ...".

The crow opened her beak and said her ugly "CAAW"...

Etiquette Rather Than Habit

In 1558, Giovanni della Cosa wrote a book “Etiquette Rather Than Habit”. The book of the Italian writer became famous very soon. In this book Giovanni della Cosa gave advice to a young man on how to speak, to dress, to behave at a table and treat people correctly. The book taught young people to be well-mannered.

Nowadays examples of bad manners are more numerous than at the time of Giovanni della Cosa. Sometimes we can see people who butt into conversations and shout in public places, who do not treat old people with respect. Sometimes we can meet people who borrow things and return them damaged, or don't return them at all, who have their radios on too loud.

If we don't want to be ill-mannered people, we must correct and improve our etiquette.

Хто сказав, що граматики – це важко? Збірник, що ви тримаєте в руках, допоможе зробити перші кроки у вивченні англійської граматики. Він містить вправи, що відрізняються як ступенем складності, так і спрямованістю: деякі з них допоможуть довести до автоматизму використання певних граматичних структур, інші навчать свідомо обирати їх і вживати в мовленні. Таблиці та схеми, у яких поданий граматичний матеріал, допоможуть краще зрозуміти й навіть самостійно сформулювати правила англійської граматики. Збірник також містить тести, що дозволять перевірити та оцінити успіхи в засвоєнні кожної з тем.
